Semi-detached house

Total floor area

80 square metres

Rules on letting this property

You may not be able to let this property

This property has an energy rating of F. It cannot be let, unless an exemption has been registered. You can read [guidance for landlords on the regulations and exemptions](#).

Properties can be let if they have an energy rating from A to E. You could make changes to [improve this property's energy rating](#).

Energy rating and score

This property's energy rating is F. It has the potential to be B.

[See how to improve this property's energy efficiency](#).

Energy efficiency chart This property's energy rating is F with a score of 30. It has a potential energy rating of B with a score of 85. Properties get a rating from A to G and a score. Rating F is for a score of 21 to 38. The ratings and scores are as follows from best to worst. Rating A is for a score of 92 or more. Rating B is for a score of 81 to 91. Rating C is for a score of 69 to 80. Rating D is

for a score of 55 to 68. Rating E is for a score of 39 to 54. Rating F is for a score of 21 to 38. Rating G is for a score of 1 to 20. .letter { font-size: 40px; font-family: sans-serif; fill: #0b0c0c; font-weight: bold; } .small { font-size: 20px; font-family: sans-serif; fill: #0b0c0c; line-height: 50px; margin-top: 100px; font-weight: bold; } .band-a{ fill: #00C781 } .band-b{ fill: #19b459 } .band-c{ fill: #8dce46 } .band-d{ fill: #ffd500 } .band-e{ fill: #fcaa65 } .band-f{ fill: #ef8023 } .band-g{ fill: #e9153b } .band-a-score{ fill: #64C7A4 } .band-b-score{ fill: #72CA8B } .band-c-score{ fill: #b4df86 } .band-d-score{ fill: #ffe666 } .band-e-score{ fill: #fdc79b } .band-f-score{ fill: #f4ac71 } .band-g-score{ fill: #f2738a } line.inner-border { stroke: #b1b4b6; stroke-width: 1; } line.score-threshold { stroke: #000; stroke-width: 2; } A B C D E F G 92+ 81-91 69-80 55-68 39-54 21-38 1-20 Score Energy rating Current Potential 30 F 85 B

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

- the average energy rating is D
- the average energy score is 60

Breakdown of property's energy performance

Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well

features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Sandstone or limestone, as built, no insulation (assumed)	Very poor
Wall	Cavity wall, as built, insulated (assumed)	Good
Roof	Pitched, 300 mm loft insulation	Very good
Roof	Roof room(s), insulated (assumed)	Good
Window	Mostly double glazing	Poor
Main heating	Room heaters, electric	Very poor
Main heating control	Programmer and appliance thermostats	Good
Hot water	Electric immersion, standard tariff	Very poor
Lighting	Low energy lighting in all fixed outlets	Very good
Floor	Suspended, no insulation (assumed)	N/A
Floor	Solid, insulated (assumed)	N/A
Secondary heating	Room heaters, wood logs	N/A

Low and zero carbon energy sources

Low and zero carbon energy sources release very little or no CO₂. Installing these sources may help reduce energy bills as well as cutting carbon emissions. The following low or zero carbon energy sources are installed in this property:

- Biomass secondary heating

Primary energy use

The primary energy use for this property per year is 440 kilowatt hours per square metre (kWh/m²).

About primary energy use

Additional information

Additional information about this property:

- Stone walls present, not insulated

How this affects your energy bills

An average household would need to spend **£2,174 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £1,355 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2022** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Heating this property

Estimated energy needed in this property is:

- 9,972 kWh per year for heating
- 1,982 kWh per year for hot water

Impact on the environment

This property's environmental impact rating is E. It has the potential to be D.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO₂) they produce each year.

Carbon emissions

An average household produces	6 tonnes of CO ₂
--------------------------------------	-----------------------------

This property produces	5.4 tonnes of CO ₂
-------------------------------	-------------------------------

This property's potential production	3.0 tonnes of CO ₂
---	-------------------------------

You could improve this property's CO₂ emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

Changes you could make

Do I need to follow these steps in order?

Step 1: Internal or external wall insulation

Typical installation cost	£4,000 - £14,000
----------------------------------	------------------

Typical yearly saving	£499
------------------------------	------

Potential rating after completing step 1	43 E
---	------

Step 2: Floor insulation (suspended floor)

Typical installation cost	£800 - £1,200
----------------------------------	---------------

Typical yearly saving	£97
------------------------------	-----

Potential rating after completing steps 1 and 2	46 E
--	------

Step 3: High heat retention storage heaters

Typical installation cost	£1,600 - £2,400
----------------------------------	-----------------

Typical yearly saving	£686
------------------------------	------

Potential rating after completing steps 1 to 3	71 C
---	------

Step 4: Solar water heating

Typical installation cost	£4,000 - £6,000
Typical yearly saving	£75
Potential rating after completing steps 1 to 4	73 C

Step 5: Solar photovoltaic panels, 2.5 kWp

Typical installation cost	£3,500 - £5,500
Typical yearly saving	£374
Potential rating after completing steps 1 to 5	85 B

Help paying for energy improvements

You might be able to get a grant from the [Boiler Upgrade Scheme](#). This will help you buy a more efficient, low carbon heating system for this property.

Who to contact about this certificate

Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

Assessor's name Richard Perry

Telephone	07917 824714
Email	richardmichaelperry@gmail.com

Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation scheme	Elmhurst Energy Systems Ltd
-----------------------------	-----------------------------

Assessor's ID	EES/017175
----------------------	------------

Telephone	01455 883 250
------------------	---------------

Email	enquiries@elmhurstenergy.co.uk
--------------	--

About this assessment

Assessor's declaration	No related party
-------------------------------	------------------

Date of assessment	26 August 2022
---------------------------	----------------

Date of certificate	27 August 2022
----------------------------	----------------

Type of assessment	RdSAP
---------------------------	-------

Other certificates for this property
